

THE FODR SYSTEM

Improve SAFETY

Improve AWARENESS

Change the way you fly.

- *Lightweight*
- *Indispensable*
- *Affordable*

October 21, 2019 *Approved for release:*

EIT Avionics, LLC announces issuance of STC No. SR04411NY, Installation of EIT Avionics Flight Operational Data Recorder for the Robinson R 44 II.

The EIT Avionics **FODR** is a high performance data recorder designed to meet 14 CFR part 135.607 Helicopter Flight Data Monitoring requirements. With FODR, even single ship operators can implement FDM safety improvements and reduce costly operational errors. FODR = data for better decision making.

Uniquely, FODR interfaces with ESAID, a display and annunciation device, to enhance *IN FLIGHT* situational awareness of critical parameters. ESAID calculates density altitude, power, hover and airspeed performance limitations twice per second, giving the pilot unprecedented situational awareness.

About EIT Avionics:

EIT Avionics LLC brings the technology and product development background of EIT LLC to avionics, creating products that provide Aviation Safety and Efficiency through Technology.

EIT LLC is a technology based company that has provided full service Electronic Manufacturing, Engineering and Product Development Services to aerospace, medical, instrumentation, telecommunications and defense related customers for almost 40 years.
