

THE FODR SYSTEM

Improve SAFETY

Improve AWARENESS

Change the way you fly.

- *Lightweight*
- *Indispensable*
- *Affordable*

Monday Sept 10, 2018

Approved for release:

EIT Avionics is pleased to announce the FAA has accepted our Certification Plan for the FODR System. The FODR System is comprised of: ESAID, FODR and HAT-R.

The initial STC will be for the Robinson R44 Raven II, with additional models following soon.

FODR is a data recorder designed to meet 14 CFR part 135.607 requirements.

HAT-R is an innovative radio altimeter designed to meet 14 CFR part 135.160 requirements.

ESAID is a touchscreen display and annunciation device designed to increase pilot situational awareness by calculating, displaying and providing aural alerts for operating performance limitations.
