EIT Avionics, LLC announces a new ED-155 Data Recorder

EIT Avionics, LLC is announcing that design has begun on the next product in our data recorder offerings, an ED-155 data recorder, designed to meet the HFDM, FDR and CVR requirements applicable to Part 23 fixed wing aircraft, Part 27 helicopters, EASA engine trend requirements, ED-155 light recorder crash and performance specifications and more.

We are currently seeking launch customers, input from distributors and operators requiring specialized parameters. Please come see us at Booth #3905 HAI Heli Expo 2022 in Dallas Texas!

Our ED-155 data recorder is an exciting development of The EIT Avionics FODR®, our HFDM data recorder solution capturing 21 channels 5 x per second. Uniquely, FODR® interfaces with ESAID, a display and annunciation device, to enhance IN FLIGHT situational awareness of critical parameters, and includes FODR View user software.
